## PROGRAM ADVISORY COMMITTEE CHAIRMAN'S REPORT

The 1986-87 school year saw the completion of the study of off-campus services. It was gratifying to note the high level of satisfaction that both school systems and parents have for these services. A particular vote of thanks must go to Dr. Owsley and the supervisors of off-campus services for all the hard work they put into gathering data, meeting with the PAC and sharing concerns and ideas about off-campus services. The final version of the APRCHH report was combined with the results of a similar study done at APRCVI and delivered to the APSEA Board of Directors in November, 1986.

During the school year, a study of future directions for regional services was begun by the APSEA Board. Dr. David Kendall is Chairman of the committee undertaking the study and, in the fall, met with the PAC to review the areas that would be examined. Both the study of vocational training programs and the off-campus services study conducted by the PAC will be used by Dr. Kendall's committee in the review of APSEA services. The PAC looks forward to the completion of this study and, in particular, to examining the recommendations that affect APRCHH.

A highlight of the year was the very successful International Symposium which was held in conjunction with the 25th anniversary of the Centre. Both that event and the development of the school over the past 25 years are a tribute to the dedication and expertise of the large number of individuals who have worked at APRCHH over the years.

The year culminated in June with the first joint meeting of the program advisory committees from APRCHH and APRCVI. The meeting, held in Charlottetown, proved an excellent opportunity for the two groups to learn more about each centre and the activities in which each PAC had been involved. A lengthy discussion was also held on the role and structure of program advisory committees. Particular issues emerging were the need for a more direct relationship with provincial departments of education and for on-going liaison between the two committees. The group agreed to meet jointly again after the Kendall Committee report has been completed.

I would like to thank the members of the Program Advisory Committee, the Director, and the staff of APRCHH for their excellent cooperation during the past year.

Respectfully submitted,

Tom Rich

*Conclusion*

*It has been a very busy year in Atlantic Canada in the education of hearing impaired children. The director attended five two-day meetings as a member of the Kendall Study Committee. Being the only representative familiar with the operation of this school required a great deal of additional effort in the form of reports and discussion. More direct involvement of staff would have been a great help in the development of long range plans for the Resource Centre.*

*The Director appreciates the continued financial support that the Resource Centre for the Hearing Impaired has received from the APSEA Board of Directors.*

*Respectfully submitted,*

Dear Dr. Owsley:

Re: Annual Report of Sickness
and Accidents for 1986-1987

The 1986-1987 school year revealed little difference to that of 1985-1986. Again upper respiratory infections and gastro-intestinal upsets were the greatest causes of those confined to the School Infirmary.

Minor injuries and illnesses were treated without complication by the infirmary nurses. One student had a fractured humerus and two students each had a fractured finger. One female student was admitted to IWK Hospital in Halifax, service of Dr. P. Bagnell/Gastroenterologist. Her condition has been stabilized. One male vocational student was referred to Dr. Parton/Neurologist, Moncton, N.B. regarding seizure activity. His condition stabilized with medication.

Consultations were arranged for several students to be seen at the ENT Clinic, Highland View Regional Hospital. Other consultations included ophthalmological, dental, general surgical and paediatric. During the school year I saw 255 students at school and 2 4 students in my office. Female students are seen at their request in my office for gynecological examinations and contraceptive guidance.

Possibly due to work overload the physiotherapist did not visit the school this year. However, appointments were made when necessary for students to be seen at the Amherst Physiotherapy Clinic.

Three conferences were arranged with Dr. M. Gill/Psychiatrist regarding behaviour modification and psychotropic medication.

Dental hygiene services were available in September/October and continues to add greatly to the improvement of oral hygiene.

All students on regular medication received blood checks at HVRH. New female students were screened for rubella immunity and all were immune.

From May to December we were pleasedto be able to share part of the infirmary with Dr. Brian Ferguson, a local physician whose office was gutted by fire. Dr. Ferguson has expressed his gratitude.

As in past years, it has been a pleasure to work with the very cooperative and competent nursing staff. An area to be addressed that perhaps goes unrecognized is the dedication and flexibility which exists within this department.

Sincerely,

Gillian Lawrence, M.D., B.S.
School Physician
